

HYDRANAUTICS PRESS RELEASE

Hydranautics Volunteers Share The Gift of Knowledge

A 5-member volunteer team from Hydranautics, the global leader in membrane technology, turned educators for a day at the 21st annual Children's Water Education Festival held on 29-30 March, 2017 at the University of California, Irvine. The objective of the festival was to educate third, fourth and fifth grade students about local water issues, the environment and to help them understand how they can protect water supplies and their environment. For many of the elementary students, it was their first visit to a university campus.

Get Ready for the Taste-Test

The presentation by the Hydranautics technology team, titled "Membranes Under Pressure", was a 20-minute hands-on activity session conducted for groups of 45 participants throughout the day. The activities in the "Membrane Under Pressure" presentation included, water filtration experiments to educate students on how contaminated water with suspended solids is treated using hollow fiber membranes for producing drinking water. Fun-filled activities wherein volunteers were blindfolded, drank a glass of water and guessed the water source, generated a lot of interest and excitement among the participants.

"Membranes Under Pressure" by the Hydranautics technology team was a roaring success at the Children's Water Education Festival as it facilitated children's understanding of our depleting water resources and led the movement to drive technology and research within the community.

ABOUT HYDRANAUTICS

Hydranautics is a part of the Nitto Group and one of the global leaders in the field of Integrated Membrane Solutions. Hydranautics offers complete membrane solutions like Reverse Osmosis, Nanofiltration, Ultrafiltration, and Microfiltration for Water, Wastewater and Process treatment and applications. Hydranautics membrane based solutions are currently in use on seven continents throughout the world for diverse applications such as Seawater Desalination, Industrial High-Purity Water, Surface Water Treatment, Waste Water Treatment, Specialty Process Applications etc. Our Global Membrane Division is headquartered in Oceanside, CA, USA and we have 3 state-of-the-art manufacturing sites located in Oceanside – USA, Shiga – Japan and Shanghai – China. For further information on Hydranautics kindly visit our website www.membranes.com

ABOUT NITTO

Nitto is Japan's leading diversified materials manufacturer. Founded in 1918, Nitto's strength is the ability to add diverse functionality to sheets, films and other materials using core technologies such as polymer synthesis, adhesion and coating technologies. The group offers over 13,000 high value specialty products worldwide including optical films for liquid crystal displays, automotive materials, reverse osmosis membranes for desalination and transdermal drug delivery patches. For further information on Nitto kindly visit our website www.nitto.com
