

June 29, 2009

Dear Valued Customer,

In July of 2009 Hydranautics - a Nitto Denko Company will be making a business software upgrade to Oracle/JD Edwards. This allows Hydranautics to continue to offer a best-in-class customer experience while providing a solid platform to support the growth of our company in the dynamic water treatment industry.

You may notice that our business documents, including order acknowledgments and invoices, have a new look – please let us know if you have any questions.

With sincere appreciation for your business,

Brett Andrews
President and Chief Operating Officer
