

# DairyNF™ Series

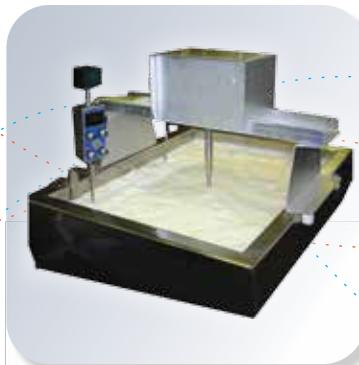

## High Flux, High Protein Rejection 150-250 Dalton Nanofiltration Membrane Elements

Hydranautics' membrane technology experience and innovation are at the core of every DairyNF™ series membrane. Specifically designed for the separation of divalent anions and/or organic molecules greater than 200 Daltons from monovalent salts and lower molecular weight organics, DairyNF™ membranes deliver exceptional performance and value.

Superior membrane technology is the key to Hydranautics' innovative DairyNF™ (Process Nanofiltration) elements. All DairyNF™ membranes are manufactured using highly controlled, ISO 9001-compliant processes, ensuring the highest quality and most consistent, reliable performance available. Hydranautics has set a new industry-standard for the rolling of full-fit membrane modules: Hand-rolling of elements has been eliminated by the use of proprietary, robot-based automatic rolling machines, specifically designed by Hydranautics for fabricating membrane modules of the highest quality. The result is a higher level of filtration and separations performance for our customers.

### Applications:

- Whey and milk concentration
- De-salting (de-mineralization) of whey and other streams
- DP1/DP2 sugar fractionation
- Recovery of hydrolyzed proteins and enzymes

### Key Features:

- All elements are automatically rolled on a proprietary robotized machine
- Elements meet FDA regulations CFR Title 21 and 3A Sanitary Standards for Crossflow Membrane Modules, Number 45-01, Section C
- USDA-accepted – sizes 3838, 3840, 8038 and 8040
- 100% testing of membrane rolls with 2000 ppm MgSO<sub>4</sub> for flux and rejection compliance
- 100% testing of elements for rejection and flow compliance

### Benefits from Auto Rolling:

- Superior glue-line adhesion and strength
- Tighter rolling and caging
- Greater flow rates due to maximum effective membrane area
- Greater structural reliability

## Type:

**Configuration** Sanitary (Full-Fit) Spiral Wound  
**Outerwrap** polypropylene Net-wrap  
**Membrane Polymer** Composite Polyamide  
**Molecular Weight Cut-off** 150-250 daltons

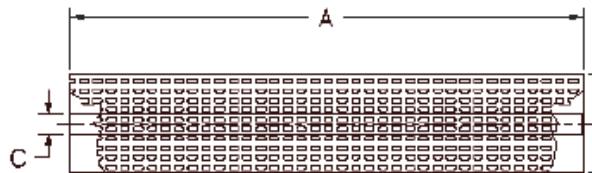

## Applications Data:

<b>Maximum Applied Pressure, psig (bar)</b>	600 psig (41 bar)
<b>Maximum Chlorine Concentration, PPM at pH&gt;10</b>	< 0.1 ppm
<b>Maximum Operating Temperature, °F (°C)</b>	122° (50°)
<b>Operating pH Range</b>	3.0 - 9.0
<b>Cleaning pH Range</b>	1.0 - 11.5
<b>Maximum Pressure Drop for a Vessel, psi</b>	60 (4 bar)

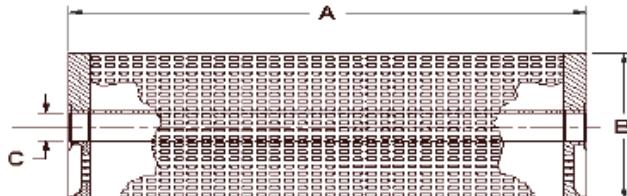

## Product and Guidelines:

Size	Feed Spacer, inches (cm)	Area, ft <sup>2</sup> (m <sup>2</sup> )	Dimensions, inches (cm)			Max. Feed Flow, GPM (m <sup>3</sup> /hr)	Max. Pressure Drop per Element, psi (bar)
