

## PRO Series

Specialty Membrane Products for Challenging Industrial Wastewaters

### PRO-XR

#### High Rejection RO Membrane

Best combination of high rejection and high flow capability at low pressures, compared to all commercial low pressure type RO elements.

### PRO-LF

#### Low Fouling High Pressure RO Membrane

Neutrally charged RO membranes that have a hydrophilic coating to minimize fouling while treating high salinity wastewaters.

### PRO-XS

#### Extra Ion Selectivity NF Membrane

High ion selectivity NF membranes designed for salt separation in the liquid stream to achieve more purified salt streams for either salt extraction or recycle.

### PRO-XP

#### Ultra High-Pressure RO Membrane

Ultra-high pressure RO membranes which can operate at pressures up to 1,800 psi (12.4 MPa), exceeding normal RO pressure limits of 1200 psi (8.27 MPa).

### Hydranautics ZLD / MLD Solutions for Different Market Segments using PRO Series Elements

Coal to Chemical

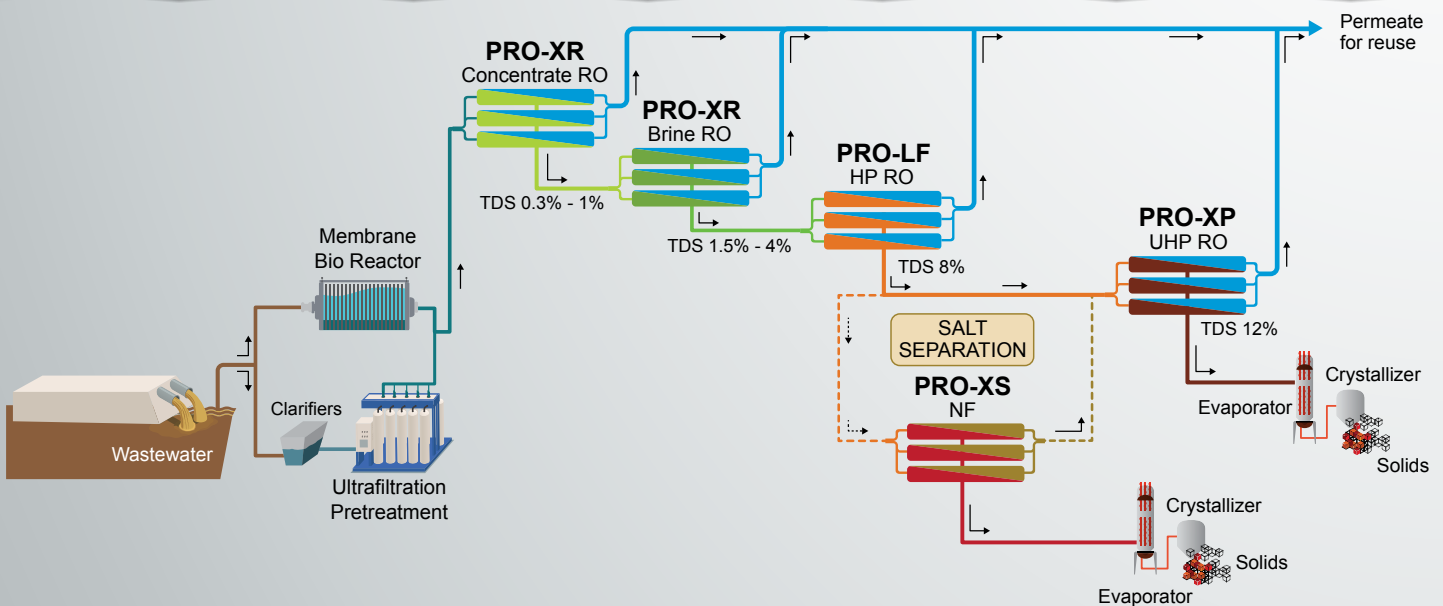

Mining

Metals

Chlor Alkali

Paper & Pulp

Power
