

To whomsoever it may concern

Hydranautics, a Nitto Group company, is one of the global leaders in membrane separation technology. Since our inception in 1963, we have been committed to delivering the highest quality and performance standards in our integrated membrane solutions.

We are globally acclaimed for consistently delivering product excellence and customer satisfaction to businesses across the world. Our product offering includes comprehensive membrane solutions – Reverse Osmosis (RO), Nanofiltration (NF), Ultrafiltration (UF) and Microfiltration (MF) for applications as diverse as:

- Potable Water
- Boiler Feed Water
- Seawater Desalination
- Industrial High-Purity Water
- Surface Water Treatment
- Wastewater Treatment
- Specialty Process Applications
- Electronic Rinse Water
- Agricultural Irrigation

With three state-of-the-art manufacturing sites located in Oceanside – USA, Shiga – Japan and Shanghai – China, we manufacture membranes for a broad spectrum of separation requirements.

Our robust customer service and technical support team is available virtually around the clock and around the world. A network of worldwide sales offices throughout the United States, Latin America, Europe and Asia efficiently supports our global business base.

We have two sophisticated research facilities in the USA and Japan. Our uncompromised commitment towards R&D results not only in ongoing development of a range of specialized membranes, but also in customizing membranes for our clients' requirements.

We take pride in being the first membrane manufacturer to be certified with ISO 9001 Quality System Certification, owing to our stringent quality framework.

Information on the Company

Hydranautics entered the RO water treatment field in 1970, and today, we are regarded as one of the frontrunners in the membrane separation space. We became part of the Nitto Corporation in 1987. We are headquartered in Oceanside, California, with a 160,000 ft² (14,684 m²) manufacturing facility spread across 14 acres.

Our products are designed leveraging Nitto's cutting-edge polymer technology and global capabilities, and cater to various industries like:

- Chemical Processing Industries
- Dairy
- Industrial
- Microelectronics
- Mining
- Municipal
- Oil & Gas
- Pharmaceutical
- Power Generation
- Residential

About Nitto Denko Corporation

Our parent firm, Nitto Denko Corporation, is Japan's leading diversified materials manufacturer. Founded in 1918, Nitto's strength is the ability to add diverse functionality to sheets, films and other materials using core technologies such as polymer synthesis, adhesion and coating technologies. The Group offers over 13,000 high-value specialty products worldwide, including optical films for liquid crystal displays, automotive materials, RO membranes for desalination and transversal drug delivery patches.

Hydranautics – Nitto Synergy

Nitto and Hydranautics have over 50 years of experience in membrane technology. We remain committed to bringing innovative membrane technologies that provide clean water to a thirsty world. Our association with the Nitto Group provides us access to more than 95 years of Nitto's experience and advanced technology. This helps us develop high-performance membranes with unmatched efficiency.

Hydranautics Integrated Membrane Solutions

At Hydranautics, we understand that the challenges faced by our clients are unique, and we help them tailor an integrated membrane solution for their requirements. For further information, kindly visit our website.

Core Competencies

- Global Leader in Total Membrane Solutions
- Product Innovations through State-of-the-Art R&D
- Customer Satisfaction through Global Technical Services
- Technology Leadership
- Global Presence
- Integrated Membrane Solutions
