

HYDRAcube® Technology

Get the most out of your UF system

HYDRAcube® is a simple, compact and robust integrated rack solution. HYDRAcube® is designed to exploit the major advantages of HYDRAcap®MAX technology, the innovative solution in pressurized ultrafiltration by Hydranautics. By combining feed, filtrate and air supply in a single piece, HYDRAcube® provides a complete UF rack solution which drastically reduces footprint, saves engineering costs and makes assembly and maintenance works of the UF system much easier.

HYDRAcube® Technology Offers:

- **Simplicity:** One piece (HYDRAcube® header) combining all the streams entering in and flowing out of the UF rack! Feed, Filtrate & Air lines integrated into single piece on top and bottom of each module.
- **Pre-Engineered System:** Minimum amount of pieces. Fast and easy to install. Quality control simplified.
- **Modularly Expandable System:** All HYDRAcap®MAX modules can be easily connected, added or removed. A single HYDRAcube® rack can contain from 2 to 34* HYDRAcap®MAX modules.
- **Reliable construction:** Reinforced PP material pieces connected through BPE (Sanitary Flange) to ensure a reliable seal. Self-supported structure. Pressure-rated to directly feed RO membranes.
- **Compact footprint:** Huge footprint savings compared to a conventional rack design.
- **Fully integrated system:** Capacity to fit 24 HYDRAcap®MAX 60 UF modules in a 20-feet HC container and 64 HYDRAcap®MAX 60 UF modules in a 40-feet HC container, using HYDRAcube® technology, for a containerized system solution. This is a complete working system which includes pumps, strainers, valves, blowers, PLC, HMI, etc.

Footprint Comparison

HYDRAcube® kit	No. of modules	HYDRAcube®, m ² (ft ²)	Conventional rack, m ² (ft ²)	% decrease

*With HYDRAcube® Gen.2

HYDRAcube® builds on proven HYDRAcap®MAX Technology:

- **Highest Membrane Area:** Modules available with membrane area up to 105 m² per module
- **TIPS PVDF fiber:** Leading to higher mechanical strength and chemical tolerance
- **Air Scour:** Allows for backwash-free operation – our standard method of cleaning
- **Dual End Filtration:** Filtrate is taken from top and bottom of the modules to provide even flow distribution along the length of the fiber

The following table illustrates examples of HYDRAcube® racks which can be provided.

HYDRAcube® Rack Offerings	HYDRAcube® rack	HYDRAcap®MAX module	Membrane area per module m ² (ft ²)	No. of rows	No. of modules per row	Total no. of modules per rack	Total membrane area per rack m ² (ft ²)
