

HYDRACoRe

HYDRACoRe[®] Series Elements for Color Adjustment and Removal

For Applications such as:

- ✓ Food and Beverage
- ✓ BioPharm
- ✓ Chemical Manufacturing
- ✓ Drinking Water Supply
- ✓ Industrial applications

De-Colorizing Of Wastewaters from Industries such as:

- ✓ Textile And Tanneries
- ✓ Pulp and Paper
- ✓ Electroplating Operations
- ✓ Cosmetics
- ✓ Fragrances

HydraCoRe10

HydraCoRe50

HydraCoRe70pHT

Hydranautics' HYDRACoRe[®] (Hydranautics Color Removal) membranes are sulfonated polyethersulfone-based spiral-wound, crossflow elements that can be used for potable water as well as industrial applications in which color reduction with minimal removal of dissolved salts is desired. The key advantage of the HYDRACoRe[®] technology is the membranes' superior chlorine-tolerance. For example, both HYDRACoRe10 and HYDRACoRe50 membranes tolerate up to 100 ppm chlorine while HYDRACoRe70pHT can tolerate up to 200 ppm.
