

High Performance Membrane Technology for Dairy Process Separations from Hydranautics

40 Plus Years of Leadership in Designing and Manufacturing Innovative Membrane Products

DairyRO

High Rejection, High-Flowing Sanitary RO Elements

For applications such as milk, whey and fruit juice concentrations, lactose and other sweetener concentrations, polishing of UF permeate

Dairy10K

High Flux, High Rejection 10,000 Dalton Polyethersulfone Ultrafiltration Sanitary Elements

For pre-concentration of milk before cheesemaking or transportation, concentration of whey or other proteins, juices, enzymes and other feed streams

Dairy5K

High Flux, Higher Rejection 5,000 Dalton Polyethersulfone Ultrafiltration Sanitary Elements

For 80% to 90% whey protein concentrations, and higher concentrations of juices, enzymes and other feed streams

DairyNF

High Flux Nanofiltration Composite Polyamide Elements

For dairy lactose removal and de-mineralization, lower pressure whey protein concentrations and separation of monosaccharides from disaccharides
