

FOR IMMEDIATE RELEASE

Hydranautics participates in Aquatech Amsterdam 2019

Aquatech Amsterdam is the world's leading exhibition for process, drinking and waste water. Hydranautics – A Nitto Group Company will be exhibiting at Aquatech Amsterdam, which will be held at the RAI Amsterdam from the 5th to 8th of November 2019.

Visit us at our booth no. 01.516 to network, exchange ideas and expand your knowledge of the current and emerging membrane technologies. We will also be showcasing our new generation specialty RO/NF products called the PRO series for wastewater treatment and key applications like Zero Liquid Discharge (ZLD) and Minimum Liquid Discharge (MLD). We look forward to meeting you there!

For more information on Hydranautics, please visit membranes.com or send an e-mail to santi.talo@nitto.com.

About Hydranautics

Hydranautics is a part of the Nitto Group and one of the global leaders in the field of Integrated Membrane Solutions. Hydranautics offers complete membrane solutions like Reverse Osmosis, Nanofiltration, Ultrafiltration, and Microfiltration for Water, Wastewater and Process treatment and applications. Hydranautics' membrane based solutions are currently in use on seven continents throughout the world for diverse applications such as Seawater Desalination, Industrial High-Purity Water, Surface Water Treatment, Waste Water Treatment, Specialty Process Applications etc. Our Global Membrane Division is headquartered in Oceanside, CA, USA and we have 3 state-of-the-art manufacturing sites located in Oceanside – USA, Shiga – Japan and Shanghai – China. For further information on Hydranautics kindly visit our website www.membranes.com

About Nitto

Nitto is Japan's leading diversified materials manufacturer. Founded in 1918, Nitto's strength is the ability to add diverse functionality to sheets, films and other materials using core technologies such as polymer synthesis, adhesion and coating technologies. The group offers over 13,000 high value specialty products worldwide including optical films for liquid crystal displays, automotive materials, reverse osmosis membranes for desalination and transdermal drug delivery patches.
