

PRESS RELEASE – FOR IMMEDIATE RELEASE

Hydranautics participates in Membrane Technology Conference & Exposition 2021

Last year numerous in-person events were canceled, postponed, or moved to virtual formats. But now with the vaccine adoption climbing, people are excited to return to live, in-person events. And so are we!

At Hydranautics, we believe that nothing can replace the dynamic of an in-person event. After evaluating all health and safety measures we have decided to participate in the upcoming Membrane Technology Conference & Exposition. The conference explores how the latest developments in membrane technology can enhance water reliability and quality. Each year the conference reveals new directions in water and wastewater treatment technologies, desalting and membrane bioreactor applications.

Hydranautics – A Nitto Group Company will be exhibiting at Membrane Technology Conference & Exposition, to be held at West Palm Beach, Florida from July 19-22, 2021. Visit us at our booth number 105, where we will be showcasing our advanced integrated membrane solutions for water and wastewater treatment.

At the booth our team of water experts will be pleased to discuss your water treatment needs and introduce you with our latest product offerings and solutions.

We will be following all safety protocols like mask-wearing, promoting usage of hand sanitizers, and maintaining socially distanced seating to protect our guests and employees at our booth.

If you would like to arrange a one-on-one meeting beforehand or need any further information on our participation, please mail us at lance.johnson@nitto.com

Finally, after more than a year of social distancing, it's time to meet again. See you at Florida!

ABOUT HYDRANAUTICS

Hydranautics is a part of the Nitto Group and one of the global leaders in the field of Integrated Membrane Solutions. Hydranautics offers complete membrane solutions like Reverse Osmosis, Nanofiltration, Ultrafiltration, and Microfiltration for Water, Wastewater and Process treatment and applications. Hydranautics membrane-based solutions are currently in use on seven continents throughout the world for diverse applications such as Seawater Desalination, Industrial High-Purity Water, Surface Water Treatment, Wastewater Treatment, Specialty Process Applications etc. Our Global Membrane Division is headquartered in Oceanside, CA, USA, and we have 3 state-of-the-art manufacturing sites located in Oceanside – USA, Shiga – Japan and Shanghai – China. For further information on Hydranautics kindly visit our website www.membranes.com

ABOUT NITTO

Nitto is Japan's leading diversified materials manufacturer. Based on four core technologies: adhesion, coating, polymer function control, and polymer analysis & evaluation, Nitto provides customers with various products such as polarizing films for displays, industrial adhesive tapes, reverse osmosis membranes for desalination and transdermal drug delivery patches. Under the brand slogan of "Innovation for Customers", Nitto is contributing to a better life by solving social issues and improving corporate value. For further information on Nitto please visit www.nitto.com
