

PRESS RELEASE – FOR IMMEDIATE RELEASE

Hydranautics to showcase its innovative solutions at the Membrane Technology Conference & Exposition 2022

Come and Meet the PROs...

Hydranautics is delighted to announce that once again this year we will be participating at the Membrane Technology Conference & Exposition (MTC) to be held at Las Vegas, Nevada from February 21-24, 2022. The conference explores how the latest developments in membrane technology can enhance water reliability and quality. Each year the conference reveals new directions in water and wastewater treatment technologies, desalting and membrane bioreactor applications.

Water reuse is mounting as global demand for the world's freshwater supplies surges. Industries & municipalities are looking for cost effective technologies to ensure adequate supply of water and preserve the diminishing natural resource. To address the growing demand of innovative technologies for the wastewater recycle and reuse. Hydranautics has introduced the **PRO series** – the membranes which have made **Water Reclamation, Recycling & Reuse... A Reality!** The elements are specifically designed to treat and reuse water from industrial processes, desalination plants, and municipal wastewater treatment plants. This year at our booth we will be showcasing this trending product range.

If you are planning to attend MTC 2022, do visit us at our booth (309) to discuss the unique challenges and requirements you have in your water treatment operations. Our experts will be happy to take you through our integrated membrane solutions for water and wastewater treatment.

To safeguard our guests and employees from coronavirus, we will be following all safety protocols like mask-wearing, promoting usage of hand sanitizers, and maintaining socially distanced seating at our booth.

If you would like to arrange a one-on-one meeting beforehand or need any further information on our participation, please mail us at lance.johnson@nitto.com

Save the date, come, and visit us in Las Vegas!

ABOUT HYDRANAUTICS

Hydranautics is a part of the Nitto Group and one of the global leaders in the field of Integrated Membrane Solutions. Hydranautics offers complete membrane solutions like Reverse Osmosis, Nanofiltration, Ultrafiltration, and Microfiltration for Water, Wastewater and Process treatment and applications. Hydranautics membrane-based solutions are currently in use on seven continents throughout the world for diverse applications such as Seawater Desalination, Industrial High-Purity Water, Surface Water Treatment, Wastewater Treatment, Specialty Process Applications etc. Our Global Membrane Division is headquartered in Oceanside, CA, USA, and we have 3 state-of-the-art manufacturing sites located in Oceanside – USA, Shiga – Japan and Shanghai – China. For further information on Hydranautics kindly visit our website www.membranes.com

ABOUT NITTO

Nitto is Japan's leading diversified materials manufacturer. Based on four core technologies: adhesion, coating, polymer function control, and polymer analysis & evaluation, Nitto provides customers with various products such as polarizing films for displays, industrial adhesive tapes, reverse osmosis membranes for desalination and transdermal drug delivery patches. Under the brand slogan of "Innovation for Customers", Nitto is contributing to a better life by solving social issues and improving corporate value. For further information on Nitto please visit www.nitto.com
